Question 14 - Estimated Time to Construct Works

The Carson Valley Comprehensive Water Plan indicates that all of the water rights owned by the Gardnerville Town Water Company will be needed to meet the future municipal water system demands in Carson Valley when long-term development capacity is reached (Table 6 on Page 30). The Water Plan Report in Table 4 on Page 23 indicates that when the population of Carson Valley reaches approximately 82,000, the present planned land uses in the Valley will be "built-out". Therefore, the estimated time to construct all of the improvements to put the water to full beneficial use will coincide with the aforementioned population level of development in Carson Valley and Extensions of Time will be required until this growth is reached as provided for under NRS 533.380.

Question 15

The purpose of this Application is to change the Place of Use to cover the entire Carson Valley to allow the use of the Water Company's water rights to meet future municipal water demands in the communities shown in Table 6 on Page 30 of the Carson Valley Comprehensive Water Plan.
